Objective

I am an aspiring technology professional with a strong passion for innovation, problem-solving, and digital transformation. I have recently completed Bachelor of Information Technology Honours in Information Systems at the University of Pretoria, I strive to apply my technical and analytical skills to develop intelligent, data-driven solutions that enhance efficiency and optimize business processes. My goal is to grow within a forward-thinking organization where I can contribute to impactful projects while continuously expanding my professional and technical expertise.

Educational History

- Boksburg High School** 2015 - 2019
Matric
- North West University** Completed (2021 - 2024)
Bcom Information Systems
Relevant Subjects: Statics, Database, Object-Oriented Language, Computer Organization and Architecture, Electronic Business, Introduction to Networks, System Design and Analysis I, Web programming, Information Systems Security, Project Management for Information Systems, Emerging Business Technologies, Business Intelligence, Management Information Systems
- University of Pretoria** Completed (2025)
Bachelor's of Information Technology Honours (Information Systems)
Research report, Data Warehousing, Management of ICT projects, Information Systems Development, Human-computer interaction, Applied data science, Management of information

Employment History

- North West University** 01 August 2022 - 30 June 2023
Supplemental Instruction (SI) Tutor for C# and Java
Provided non-remedial support to students, enhancing their understanding of C# and Java programming.
Developed skills in communicating complex technical concepts effectively.
- Consnet** 01 August 2025 - 14 May 2025
Learnership Programme
 - Collaborate with IT and product teams to implement automation solutions using Power Automate to train AI models and create intelligent workflows.
 - Utilize Genesys Cloud and Sinch Chatlayer platforms for chatbot development, API integration, and flow optimization for client solutions.
 - Perform API integrations on Zoho CRM and Zoho Voice to enhance data flow and client interaction systems.
 - Assist in documenting technical processes, user manuals, and training materials for cloud platform systems.
 - Worked closely with business stakeholders to elicit, analyse, validate, and document requirements at the appropriate level of detail.
 - Conduct client training sessions to ensure smooth adoption of system updates and functionality changes.
 - Provide technical troubleshooting, system configuration, and performance feedback to improve platform efficiency.
 - Ensured documentation remained up to date and aligned with changing business and system requirements.
 - Interpreted business requirement specifications and translated them into detailed system and functional specifications.
 - Collaborated with development and testing teams to ensure solutions were correctly implemented and tested against requirements.
 - Assisted in designing test scripts and supporting system validation activities prior to UAT, working under guidance to ensure requirements alignment.
- BMW Group South Africa** 15 May - Present
IT Intern
 - Support HR digital transformation initiatives through AI adoption and process improvement.
 - Analyse HR business processes and identify opportunities for automation and workflow optimisation.
 - Train and guide HR teams on the effective use of AI tools to improve productivity and reduce manual work.
 - Act as a liaison between HR stakeholders and BMW IT Hub teams to communicate business and system requirements.
 - Collaborate with AI and IT teams on system enhancements and process improvement initiatives.
 - Perform data cleaning, analysis, and reporting to support HR operational insights and decision-making.
 - Assist in documenting business processes, requirements, and technology solutions.
 - Facilitated an AI enablement workshop for multiple HR business units, delivering prompt engineering training and designing interactive, business-focused challenges that demonstrated practical AI applications within HR workflows.
 - Guided employees on responsible AI usage and effective prompting techniques, helping teams integrate AI tools into their daily work and improve productivity.
 - Developed Power Automate workflows to automate HR business processes and improve operational efficiency.
 - Collaborated with HR stakeholders to analyse manual processes and identify automation opportunities.

Skills

- Programming Language C# (IDE: Visual Studio) - Console, Windows App.Net
- Programming Language Java (IDE: Netbeans and IntelliJ IDEA) - Backend and Front end

- Programming Language HTML, CSS, JavaScript (IDE: Visual Studio Code) - Front end and Backend.
- Designing a ERD (Snowflake, Star Schema), Structuring a data dictionary, integration of php database connection.
- Networking Network Design Cisco Packet Tracer.
- Documentation Models PERT Chart Data Flow Diagram Use Case Diagram System Architecture System Testing
- Business Writing: Experience in creating business cases, proposals, and technical documentation.
- Data Analysis: Proficient in analyzing data to support business decisions.
- Microsoft Office Suite: Skilled in Excel, Word, PowerPoint, and Outlook.
- Systems Analysis: Experienced in designing and analyzing systems to meet stakeholder requirements.
- Quality Assurance: Committed to maintaining high standards of quality and productivity in all tasks.
- Sales and Communication Skills: Exceptional verbal and written communication with experience presenting ideas effectively Foundational negotiation skills with an ability to influence and engage stakeholders Comfortable interacting with C-level stakeholders
- Proficient in ERP and CRM fundamentals with practical experience in information systems integration
- Methodologies Agile Scrum, SDLC, Systems Analysis & Design
- DevOps Tools Git, GitHub, Docker (basic exposure)
- Other Tools MS Office, XAMPP, cPanel, PHPMailer (email OTPs)
- Concepts & Fundamentals OOP, REST APIs, Data Structures & Algorithms
- React.js

Soft Skills

- Analytical Thinking & Problem Solving: Skilled in breaking down complex system problems, identifying potential risks early, and proposing scalable solutions.
- Leadership & Team Collaboration: Frequently selected as project leader in group work; adept at organizing tasks, motivating teams, and driving project success.
- Adaptability & Growth Mindset: Thrive in dynamic environments, continually learning from past challenges and applying insights to improve solutions.
- Communication: Confident public speaker with experience presenting to large audiences (up to 1000+ people) and leading client presentations.
- Adaptability & Continuous Learning

Projects

- **North-West University Registration System**
Third Year Project (2023)
Role: Project Leader and Software Engineer
Developed a web application for student registration, including biographical updates, eligibility validation, and demo payment gateway integration.
- **University Cafeteria Food Ordering System**
Final Year Project (2024)
Role: Project Leader and Software Engineer
As the project leader and software engineer, I am leading a team in developing a food ordering system to address the issue of long queues at our university cafeteria. The system is designed to exclusively serve university stakeholders, enabling them to order food online and receive deliveries on campus. This project aims to enhance the efficiency of cafeteria services and improve satisfaction among students and staff.
- **Online Election System (Personal Project)**

Description: Developed a secure and transparent online election platform with real-time statistics, voter registration, and live vote tracking.

Technologies Used: HTML, CSS, JavaScript, PHP, MySQL, Chart.js, MailCheck.ai API

Role: Project Leader & Backend Developer
- **EduLearn: Online Learning Platform (Hackathon Project, 2024)**
Description: Built an interactive educational platform for Grade 6-8 learners with tools powered by GeoGebra API to enhance math skills.

Technologies Used: HTML, CSS, JavaScript, PHP, GeoGebra API

Role: Program Leader
- **HR Analytics Dashboard (BMW Group SA)**
 - Designed and developed HR reporting dashboards using historical workforce data.
 - Cleaned, transformed, and analysed raw Excel datasets using Python, Pandas, and NumPy.
 - Supported HR reporting and decision-making through data visualisation and trend analysis.
 - Translated reporting requirements into interactive and structured dashboard solutions.
 - Technologies: Python Pandas NumPy Excel Data Analysis
- **Consnet Digital Bot – Employee & Customer Service Demo**
 - Designed and configured a Genesys Cloud digital chatbot demonstrating API-driven self-service automation.
 - Built conversational flows for employee and customer support use cases using Genesys Cloud Architect.
 - Integrated mocked backend services using Data Actions and Postman Mock Servers.
 - Assisted with testing, validation, and documentation of chatbot functionality.
 - Technologies: Genesys Cloud APIs Automation JSON Postman

Achievements & Awards

- *Telkom Hackathon – Mahikeng Innovation Hub & National GKHACK24 (2024)* Achievement: Won the North West Provincial Hackathon, earning an invitation to the National Telkom Learn Hackathon. Participated in the GKHACK24 event hosted by Geekulcha, where 71 teams

competed, and our team ranked in the top ten. Project: Developed an online educational platform aimed at improving the learning experience for Grade 6-8 students in South Africa. The platform focused on providing access to educational resources, including textbooks and interactive tools, to enhance mathematical skills. It featured APIs like GeoGebra for interactive learning and assessments to measure student progress. Role: Served as Program Leader, overseeing project design, coding, and implementation using HTML, CSS, JavaScript, and PHP, ensuring the platform met the needs of disadvantaged communities.

Certificates/ Achievements

- JavaScript beginner Certification (Code Academy 2024)
JavaScript Immediate Certification (Code Academy 2024)
Project Management Problem Solving Certification (IBM 2024)
Learn React: Introduction Course
Learn React: Lifecycle Methods Course
